

D/C Red No.6 Aluminum Lake

DISTRIBUIDORA Y CONVERTIDORA INDUSTRIAL

Common name

Double Concentration Red No.6 Aluminum Lake.

| | |
|-----------------|-----------|
| CAS No. | 2611-82-7 |
| EEC No. | E-124 |
| C.I No. | 16255:1 |
| Synonyms | Red 7:1 |

Description

Pigment prepared with Red No.6 (Ponceau 4R) in aluminum hydroxide substrate.

Sensitive properties

Red colored fine powder, impurities and strange matter free.

Function

Pigment.

Solubility

Water insoluble.

Specification

| | |
|---------------------------------|-----------------|
| Color concentration [%]: | 36 min; 42 max. |
| Chloride & Sodium Sulfates [%]: | 2 max. |
| Volatile Matter (135°C) [%]: | 17 min; 23 max. |
| Arsenic [ppm]: | 3 max. |
| Lead [ppm]: | 10 max. |

Stability

Stable in acid and alkaline media, the optimal pH to use is 4 to 9. It presents greater stability to light than water-soluble dyestuffs.

Standard packing

10 Kg. Paper bags with 300 gauge LDPE bag inside.

Storage

Store the product away from light, heat and moisture, in tightly sealed containers at room temperature in a dry and dark place.

Applications

Fatty products, products that do not contain enough moisture to dissolve the dyestuffs.

Foodstuffs: bakery, confectionery, dairy products, desserts, condiments.

Pharmaceutical products: capsules, coated tablets.

Other applications: cosmetics (lipsticks, pencils, lotions) packaging (plastic films, waxy coatings) inks, etc.

Note

D/C Red No.6 Aluminum Lake should be handled according to its Material Safety Data Sheet.
